Smart Card Software Developers

Logos Smart Card develops software for smart cards. Smart cards are being used in mobile phones and as payment cards. The global smart card market is growing and Logos is faced with an increasing demand. We have a number of open positions for qualified smart card software developers for payment products at our premises in Herlev.

Tasks and Responsibilities

You will participate in the development of smart card operating systems and applications. You will take part in the full development life cycle including specification, design, implementation, security and vulnerability analysis, test and documentation. Smart Card software is typically written in C and Java Card. Security considerations and protection against various attacks are an integral part of the development.

Qualifications

We expect that you hold a Master's degree in Software Engineering or Computer Science with focus on embedded development. You have a solid experience in C programming. Additional experience from related positions, e.g. in the smart card or payment industry will be an advantage. You must be fluent in English (written and spoken). You have excellent cooperation skills and enjoy our informal working environment. You are intelligent, open minded, and eager to learn new skills and technologies. You are able to work independently while keeping focused and keeping track of your own progress according to plans. You understand the importance of quality and take pride in delivering impeccable work products.

Our offer

You will become part of a global company offering great opportunities for you both personally and professionally. You will learn new techniques and technologies through job exposure as well as formal training. You will be part of a team of competent colleagues, all open to share and receive advice. You will enjoy a high level of freedom with responsibility, allowing you to manage your time in a flexible way while paying attention to both private and company needs. We offer a salary package that matches your qualifications and experience.

Application

Please send your application including CV and scanned copies of your diplomas to job@logossmartcard.com. For further information about these positions, please contact Head of R&D Christian Maegaard on +45 29 64 93 01.
