

Team Leader and Project Manager for Payment Products

Logos Smart Card develops software for smart cards. Smart cards are being used in mobile phones and as payment cards. The global smart card market is growing and Logos is faced with an increasing demand. We have an open position for a Team Leader and Project Manager for our Payment Product Development at our premises in Herlev.

Tasks and Responsibilities

You will lead a small team of dedicated engineers that are developing the payment products for the global market. This involves project planning, execution and monitoring as well as maintaining the overall product road map in co-operation with Product Management. The tasks also involve communication to third parties such as schemes (e.g Visa, MasterCard) and certification laboratories. The management of product certification, renewals and product life cycle is also part of your role. You will have regular communication with representatives of the regional sales offices to understand the requirements and to update on progress on the ongoing projects and certifications.

Qualifications

We expect that you have a background in embedded software engineering. You have experience from project or team management or a desire to move your career in this direction. Experience from the smart card or payment industry will be an advantage. You must be fluent in English (written and spoken). You have excellent cooperation and management skills and enjoy our informal working environment. You are intelligent, open minded, and eager to learn new skills and technologies. You understand the importance of quality and take pride in delivering impeccable work products.

Our offer

You will become part of a global company offering great opportunities for you both personally and professionally. You will learn new techniques and technologies through job exposure as well as formal training. You will be part of a team of competent colleagues, all open to share and receive advice. You will enjoy a high level of freedom with responsibility, allowing you to manage your time in a flexible way while paying attention to both private and company needs. We offer a salary package that matches your qualifications and experience.

Application

Please send your application including CV and scanned copies of your diplomas to job@logossmartcard.com. For further information about these positions, please contact Head of R&D Christian Maegaard on +45 29 64 93 01.
