

We're looking for a Linux System Engineer with shell programming and DevOps technology experience. It's a back office position responsible for building automated tools and automated testing for Operations and R&D departments. You will be responsible for providing technical assistance on the Logos Solvo suite of products.

### Key Responsibilities

- Qualifying the product from Installation to usage perspective
- Troubleshooting and testing the application for integration before commercial deployment.
- Installation and Deployment testing
- Building automated tools and scripts
- Deliver results in a timely manner with special attention to deadlines and scheduled time frames.
- Provide support to Operations and R&D teams.

### Qualifications

- Hold a degree in Telecommunication Engineering or Computer Science or any other related field.
- Have 2-3 years proven track record in Linux-based engineering or operations (configuration, maintenance, deployment, coding).
- Experience in high availability techniques such as load balancing, clustering, redundancy, and fail-over.
- Experience in Linux/Unix - Red Hat Linux preferred.
- Experience in database and SQL concepts. Experience in PostgreSQL will be advantageous.
- Experience with networks, firewalls and TCP/IP.
- Experience with high end server hardware such as HP DL380, HP Blade and Storage Area Network.
- Strong shell programming skills, as well as familiarity with Python/Perl or similar languages
- DevOps technologies experience – Jenkins, Ansible, Sensu or similar
- Cloud experience - AWS preferred.
- Experience in SMPP connections is desired.
- Knowledge in integration protocols such as SOAP, XML, and HTTP POST/GET.
- Web Server - Experience in JBOSS is desired.
- Telecommunications experience is a plus

### Additional Requirements

- Fluent in English (written and spoken)
- Demonstrate technical problem solving proficiency.
- Excellent customer service and communication skills, both verbal and written.
- Ability to work both independently and as part of a team.
- Ability to multitask and work well in a fast-paced environment.
- Occasionally works flexible schedule and on-call services.

### Our offer

You will become part of a highly successful global company offering great opportunities for you both personally and professionally. You will work with very competent and committed colleagues all open to share and receive advice. You will enjoy a high level of freedom with responsibility, allowing you to manage your time in a flexible way while paying attention to both private and company needs. We offer a salary package matching your qualifications and experience.

### Application

Please send your application including CV to [job@logosmartcard.com](mailto:job@logosmartcard.com). For further information please contact Kent Rasmussen on +45 31158016.
